# Kattegat

NE Atlantic Ocean - Kattegat

 The Kattegat or Kattegatt is the sea area bounded by the Jutland peninsula and the Straits islands of Denmark .

The main islands of the Kattegat are Samsø, Læsø and Anholt, where the latter two, due to their dry summer climate, are referred to as the Danish desert belt.

The central islands, banks, and shoals divide the Kattegat into two main channels. The E channel, which is most commonly used, is deeper than the W channel and is less encumbered with dangers.

## 1 - Hamneskär

NE Atlantic Ocean - Kattegat

The lighthouse at Pater Noster, situated at Hamneskär, has been in use since 1868 and was switch off 1977. The construction in cast iron is design by the famous Nils Gustaf von Heidenstam.

## 2 - Marstrand

NE Atlantic Ocean - Kattegat

11°35.14 E

🇬🇧 Small port.

🇫🇷 Petit port côtier.

### 3 - Skagen - DK

NE Atlantic Ocean - Kattegat

📍 Skagen, The Gray Lighthouse

57°44.13 N  
10°37.81 E

## The Gray Lighthouse

### Skagen

In 1857-58 Skagen new lighthouse was built by architect N.S. Nebelong little further out towards the branch than the white lighthouse. The 46 meter tall lighthouse ia built on a formidable foundation consisting of 429 meter long piles stk.16 is struck down into the seabed within an octagonal Sheet. The tower is bricked up of Flensburg bricks, which are covered by Dutch clinker. In 1875 the tower was reinforced, since there was into brick 12 iron anchors, The windows used oak. All building materials were shipped to Skagen, since there was neither a usable road or rail to the city on construction time.

### 4 - Vinga

## 5 - Hirsholm - DK

57°29.13 N  
10°37.48 E

NE Atlantic Ocean - Kattegat

### Hirsholm

I 1886-87 opførtes det nuværende fyrtårn, som er 27 m. højt og bygget af granitsten fra Hirsholmene. Både det gamle og det nye fyrtårn er placeret på øens højeste punkt, det seks meter høje Ørnebjerg. Det gamle fyr er naturligvis ikke i drift mere, men eksisterer stadig og benyttes i dag som udkigstårn.

Den granit hvoraf Hirsholmene er dannet, og som fyret er opført af, var allerede i 1880 taget i anvendelse til Nørre Rønner og i 1884 til Lodbjerg fyr.

Det nye fyrtårn blev forsynet med et 1. ordens linseapparat med 5-vægers moderatørlampe. I 1904 blev brænderen udskiftet med en glødenetsbrænder til petroleum. Hirsholm fyr blev dermed det sidste fyr, som benyttede moderatørlampe

### 6 - Frederikshavn

57°25.99 N  
10°33.08 E

NE Atlantic Ocean - Kattegat

🇬🇧 Port protected by a breakwater.

## NE Atlantic Ocean - Kattegat

Anholt

## Anholt Lighthouse

The first lighthouse in Denmark was established in Skagen and Anholt in 1561. For many years there was a tilt beacon on Anholt eastern end, but in 1788 this was replaced by the brick lighthouse which stands there today was built under the leadership of Poul Løvenørn. During the 1807-14 war England was all Danish lighthouses

off, but the British captured the island and then turned again lighthouse. They built a fortress around the lighthouse, "Fort York" called. Around the lighthouse, they built a kassemat showing the inner part is there still today. In 1881 the lighthouse was raised to its current height of 42 meters.

## 11 - Mariager

56°39.23 N  
9°58.95 E

## NE Atlantic Ocean - Kattegat

🇬🇧 Small port.

🇫🇷 Petit port côtier.

## 12 - Halmstad

56°39.11 N  
12°50.74 E

NE Atlantic Ocean - Kattegat

Port protected by a breakwater.

Port protégé par une digue.

Halmstad est une ville industrielle située au fond d'une profonde baie. Le port de plaisance n'a aucun intérêt si ce n'est d'être bien abrité. Il n'a aucun charme et n'est pas organisé pour recevoir des bateaux de passage. Il faut néanmoins signaler la gentillesse des plaisanciers locaux et des responsables du port qui font le maximum pour

être agéables aux malheureux qui viennent se perdre chez eux.

## 13 - Fornæs - DK

NE Atlantic Ocean - Kattegat

56°26.61 N  
10°57.44 E

## Fornæs Lighthouse

Grenaa

After England War 1807-14 was the marking of the Danish coasts to a halt. In 1830 lighthouse inspector C.A. Leth responsible for the Danish lighthouse. And he spent 1838-1839 two new lighthouse construction, first lighthouse at Hirsholmen and then lighthouse at Fornæs just north of Grenaa. In 1892, the current 27 meter high lighthouse, built of granite stone in 67 shifts, since it is built on a solid chalk layers. Stairs inside the lighthouse has 84 steps and is performed in finely hewn granite stones which are sealed in the tower's outside wall.

56°09.46 N  
10°13.54 E

NE Atlantic Ocean - Kattegat

Harbor protected by a breakwater.

Port de commerce protégé par une digue.

## 16 - Sletterhage - DK

56°05.71 N  
10°30.77 E

NE Atlantic Ocean - Kattegat

## Sletterhage Lighthouse

### Helgenæs

On the southwestern ornaments of Helgenæs is Sletterhage lighthouse. Located off the gulf of Århus, Århus Municipality had set up a lighthouse here already in 1872, and this lighthouse was taken over by Lighthouse-administration in 1894. It replaced the old lighthouse with the days following, new, 16 meter high lighthouse, which is listed in reinforced concrete. The tower rests on a concrete foundation, which is 4 meter in diameter.

12°05.71 E

NE Atlantic Ocean - Kattegat

## 24 - Revsnæs - DK

NE Atlantic Ocean - Kattegat

55°44.62 N  
10°52.15 E

## Revsnæs Lighthouse

West of Kalundborg

Revsnæs lighthouse was built in 1844. After England 1807-14 war ships were increasingly way through the Great Belt and from the Baltics. Thereby avoiding the healthy to pay customs at Helsingør. In 1830 sent the 12 skippers in vain a letter to the Admiralty in Copenhagen to have marked the Great Belt, and again in 1836 complained 45 skippers at the lack of traffic sign. Then there was constructed a lighthouse on Fornæs on Hesselø and Revsnæs. The lighthouse was a 11 meter high square tower which was grouped with lighthouse keeper dwelling. In 1859 the lighthouse was increased by 4 meters to its current height.
